Learning Mandarin at School (New Program)

Dear Parents,

For two years we have been able to offer Mandarin afterschool on Thursday afternoon. A teacher of Mandarin has worked in the library with a few interested students. This has also led to two cultural exchanges with groups of students from China visiting our school. The interaction between cultures has been a great benefit to our students who have met new friends from China. It has also support our students who are currently learning about Asia.

We are interested to see whether parents would like to have their children learn Mandarin. A modified program over 10 weeks is available for students. At the end of the program students should be able to converse with basic Mandarin to include common phrases, welcoming/farewelling, asking for assistance and much more. Parents could also follow up at home, practising what has been taught. (A small cost is involved to pay for the teacher of Mandarin)

The Mandarin at school will be available for Students Years 2 to 6. Opportunity is also available for students to at first come and see if they would like to learn Mandarin. If you would like to join Mandarin lessons please complete the return slip below and return to the school post box, office.

Interest in learning Mandarin after school

I would like my child ______________________________ of class _____ to have the opportunity to learn Mandarin at school. The 10 week program will be held in the library on Thursdays.

Parents will be updated by enews regarding the starting date.
Please return to the office for Tuesday 16th.
